

Stonewood Partnerships are delighted to announce that we will be developing the residential scheme at the Tannery and will be working with J&T Beaven to refurbish the commercial buildings.

Stonewood is an award-winning construction and development group with fifty years of experience delivering high quality schemes throughout the Cotswolds, and South West of England. We have developed an excellent reputation for developing stunning bespoke individual homes along with small to medium sized housing developments.

The Tannery is an exciting opportunity to breathe new life into a landmark site and fits perfectly with our ambition to create beautiful new homes in prime locations.

We anticipate that the scheme will take approximately 2 years to develop with a target completion of Autumn 2021. This is a significant build programme and we will endeavour to keep disruption to a minimum. Working closely with the Parish Council we will provide regular updates and communications to keep local people informed.

Over the next few months you will begin to see activity on the site beginning with demolition and site clearance from November 11th onwards. The site and compound will then be prepared from January 2020 for work in earnest to begin on the new homes from March onwards.
