Subject: a new information tablet for the village

Dear Steve

I attach a (very) rough idea of how I think the tablet might look.

I have changed the intent from all walking to history and life today, with one walk (and variation) and one or two others on QR code. I think visitors are more likely to follow the walks so presented.

If you like the concept, please let me know. I can quote for part or all production, inc writing and/or editing, artwork and print to weatherproof adhesive vinyl.

best wishes

Stephen
